LAMP Technology:

The **LAMP architecture** has become popular in the web industry as a way of deploying web applications. PHP is commonly used as the P in this bundle alongside Linux, Apache and MySQL. Building systems that include forums or communities, organizers, project management tools, calendars, shopping carts, mailing lists, and all sorts of useful applications can be done using the LAMP technology. **PHP or Hypertext Preprocessor** is a widely used general purpose scripting language that is especially suited for **web development**. It is usually employed to create **dynamic web page content** and has been extensively utilized to create the user-facing GUI portions of websites such as **Facebook, Yahoo, Wikipedia and Tagged**. The beauty of PHP lies in its simplicity. This means that choosing PHP as your implementation language allows you to build a dynamically-generated webpage quickly and easily.

BRAINVIRE LAMP Practice:

The LAMP architecture that has become popular in the web industry is an integral facet of our ways of deploying web applications. BRAINVIRE has been at the forefront of the PHP revolution and has harnessed its simplicity into crafting superior dynamic web pages. At BRAINVIRE, we intend to offer you cost effective solutions and this is made possible through the use of PHP as its actual code is available to the public for free. We believe in giving you the benefit of the latest technology. PHP scripting language is growing day by day. Our **PHP developers use PHP5** a fully object oriented language and its platform independence and speed on Linux server helps to build large and complex web applications. At BRAINVIRE we value portability and therefore use PHP / MySQL applications which are portable across operating systems and environments like PC, Mac, Linux, UNIX, Windows, Lindows, Internet, Intranet etc... This means we can develop applications for a Windows PC, and have it accessed by users in another part of the globe who can run it on their Linux boxes.

Our LAMP architecture expertise hails from:

- **PHP Technology Excellence** – Core Competency Subject Matter Experts
- **Extensive & skilled development** experience on **LAMP** architecture
- **Proven PHP web page development** experience
- **Proven and tested social networking platforms** for LAMP environments
- **Proven Web 2.0** Development Skills – As a low cost provider
- **Open Source Leadership** – Powerful systems can be designed truly from a high performance / low cost standard
- **Business Intelligence /Consulting approach** – Dedicated consultants to work with the client to help implement and mould his/her ideas into end results
- **Our LAMP competencies include:**
 - PHP 5
 - Symfony framework
 - Zend
 - CodeIgnitor
 - Laravel
 - Cake PHP
 - RoR
 - Node JS
 - Angular JS
 - AJAX
 - MySql (All versions)
 - Mongo DB

Simplepons is a subscription-based local e-commerce savings application (app), designed to connect merchants to consumers by offering buy one get one free (BOGO) or goods and services at a 50% discount or greater. Unlike daily deal websites which solicit their members daily via email to purchase coupons one at a time, Simplepons sells its customers a mobile app which will contain a bundle of 100's of local deals -- all at once. With the Simplepons approach, customers get to buy all the deals, all at once, and all for one low price for use whenever they want to use them.

<http://ebcouncil.com/>

<http://wookart.ecomextension.com>

Wookart is an e-commerce virtual mall cum SaaS-based model where retail merchants can sign up and create their own e-commerce and m-commerce stores with their own domain names. Signing up with Wookart to create your own e-commerce and m-commerce store will also enable the retail merchant to list his products/services on Wookart.com, which will function as a virtual mall, where customers can visit and browse the different kind of stores and products/services housed in Wookart and if interested, make purchases.

Retailers will be able to create their own online store with the branding, colours and design templates of their choice. Wookart shall not only be a virtual mall but also help the merchants with accepting payments on their store, delivery and logistics and online marketing of the merchant's store.

Wookart shall empower any and all retail merchants to have an online and mobile store without having the need to employ and manage a full-fledged IT and e-commerce team. Wookart shall host all its merchants' store on the cloud whereby the merchant can just plug into our system, select his design, give a domain name, upload his products and start selling.

<http://demo2.gmiworks.com/affiliateplatform/web/>
