## Magento Technology:

The simplicity, ease of use and rapid nature that eCommerce has attributed to the present day business and financial transactions are undeniable. The role of ecommerce platforms is important, but so subtly entrenched within everyday life that we hardly notice their presence even when enjoying their cutting-edge features. Magento is one such ecommerce platform that today, is one of the fastest growing technologies and enjoys widening acceptance by the passing moment. Attributing versatility and freedom which give creativity a free reign, Magento opens the door for innovative solutions to be conceived. Portraying an open source nature, Magento offers economical solutions catering to web application development demands from all strata of the industry. The array of features including SEO and expansion of business market makes Magento a viable choice for contemporary eCommerce development.

### **BRAINVIRE Magento Practice:**

Acquiring technological expertise of the highest order to cater to the extremely dynamic technology arena has been an inherent strength at BRAINVIRE. Keeping with this tradition, BRAINVIRE has molded and trained its team of skilled developers to harness the dormant power of Magento eCommerce platform and transmute it into state-of-the-art solutions that set benchmarks in the industry. The plethora of features that Magento offers are ably wielded by our team to leverage the extensive functionalities such as marketing promotions and tools, analytics and reporting, SEO – Search Engine Optimization, mobile commerce, site management, catalog management, order management, multi-lingual support etc... Building upon the revolutionary features that this cutting-edge eCommerce platform brings to the table, BRAINVIRE proves to be an able ally in the eCommerce and web application development arena.

- ✓ Customize your mobile store as you wish
- ✓ Develop and support iPhone app within 2 weeks

- **Ecommerce Platform**

URL: <http://www.brainvire.com/ecommerce-platform/>

E-Commerce Platform is one of those rare web platforms that will empower you, being a store owner, to have a better control over the online store without having any technical knowledge or skills. It is "One Stop-Shop for all your eCommerce online store needs & deeds. E-Commerce Platform is committed to help the small and mid-size companies and professionals to own their personalized online store with a whole host of features at the most affordable rates.

Here are few of the features of our eCommerce Store:

- ✓ Aesthetically appealing layout & design
- ✓ Easy learning curve
- ✓ Pre-installed premium Magento Extensions
- ✓ One stop-shop
- ✓ 24x7 Technical support

- **Gift Card**

URL: <http://www.ecomextension.com/magento-gift-card-extension.html>

Magento Gift Card Extension allows you to buy online gift cards for your friends and family. They can then use these gift cards to pay for products purchased at your store.

- **SOLR Search**

URL: <http://www.ecomextension.com/solr-search-extension.html>

Solr Search Extension for Magento is one of the best extensions that make your customers feel too comfortable and let them search and find the products they are searching for easily and quickly. It has also ability for Layered Navigation Filter. They get not only quick, but also relevant results.

- **Imagine Attribute With Swatch**

URL: <http://www.ecomextension.com/imagineattribute.html>

Imagine attribute with swatch Extension enables store owners to add icons and images that are more user friendly than textual information. Icons and images provide customers with a better shopping experience that include pictures along with the product information.

- **Abandoned Cart**

URL: <http://www.ecomextension.com/abandoned-cart.html>

Sometimes a user adds a product to the cart, but does not end up buying it. The fact that customers added the product to their cart, means that they were interested in your products!

- **Order Import**

URL: <http://www.ecomextension.com/order-import.html>

A busy Magento store sees a bulk of orders on a daily basis. It's a challenge to process each order when migrating to another Magento store!

- **Delete Order**

URL: <http://www.ecomextension.com/delete-order.html>

In Magneto, you can't delete orders. This extension allows deleting order. Easy to delete order in backend seamlessly through the Action dropdown box on the native Order Manager.

- **Quick Shop**

URL: <http://www.ecomextension.com/quickshop.html>

The Magento Quick Shop Module allows user to quickly view the product information without leaving the current page.

- **Banner Slider**

URL: <http://www.ecomextension.com/banner-slider.html>

This extension is a banner management tool, adding the ability for online shops to display banners as a slider of images at the top of their web's page. Hence, site owners can place banners of different advertisers or may run banners of some promotional campaigns at the most noticeable position.

- **Social Media**

URL: <http://www.ecomextension.com/social-media.html>

Social media extension for Magento is a combination of Facebook, Google Plus and Twitter extensions. The extension lets your customers connect to your store by signing in their Facebook, Google Plus and Twitter account. How amazing that would be!

- **Facebook Connect**

URL: <http://www.ecomextension.com/facebook-connect.html>

The Facebook Connect Magento Extension allows user to login and connect to your store by simply logging into their Facebook account. You can configure the Facebook Link Extension Module with the Facebook account of a customer so that if he/she login's into their Facebook account and make a purchase, a post is automatically left on the customer's Facebook wall when they complete an order.

- **OnSale View**

URL: <http://www.ecomextension.com/onsale-view.html>

The On Sale Magento Extension attracts the customer's attention to your specific products and offers by simply adding visually appealing graphical labels to the product images. The labels can be displayed on the Category as well as on the Product page. You have the option to customize or upload the label image and text for each product of your own choice or you can choose a label image and text that comes with the software package.

- **Twitter Connect**

URL: <http://www.ecomextension.com/twitter-connect.html>

Twitter is the most popular social media tool used by millions of people worldwide. On an average, 460,000 new twitter accounts are created every day. Magento is an Open Source E-Commerce Solution offering fantastic opportunities for e-commerce owners to engage with the potential customers and create awareness of their

products among the wider audience. Our Magento Twitter Connect Pro Extension allows the user to connect to Twitter and thereby allowing expanding the marketing standards.

- **Testimonials**

URL: <http://www.ecomextension.com/testimonials.html>

Testimonial Connect Magento Extension allows you to have testimonials into your online shop. It allows the customer to write reviews about your store, products and services thereby enhancing the sales and revenue opportunities. The Customer Testimonials will attract new visitors and persuade them to buy products from your store. This extension also helps admin to manage the number of words and avoid spam.

- **AJAX Cart**

URL: <http://www.ecomextension.com/ajax-cart.html>

The AJAX Cart Pro is a Magento Extension that allows user to add, update and remove products from their shopping cart in a much easy way without the need of page reloading or refreshing. With Ajax Cart Pro you can replace page reloads with the smooth and appealing animation effects.

- **Featured Products**

URL: <http://www.ecomextension.com/featuredproducts.html>

Featured Products Extension allows you to define your featured products and helps to drive more customers' attention to your most profitable products in the Magento web-store. This extension will definitely boost your revenue opportunities by attracting the customer's interest in your products that you want them to buy.

- **Dynamic Image View**

URL: <http://www.ecomextension.com/dynamic-imageview.html>

Dynamic Image Swatcher is a code and attribute-based image mapping and dynamic image generation extension. This extension enables user to add colors and create images for their configurable products based on the user's attribute selection. The Magento Dynamic Image Extension has interactive shopping cart features and thereby attracts more consumer participation.

- **Order Comment**

URL: <http://www.ecomextension.com/order-comment.html>

With the help of Order Comment Magento Extension the user can add comments to the order that they have placed. Surprisingly, Magento does not have the inbuilt functionality where in the customer can place his/her comments in response to the order made. Our Order Comment Magento Extension provides two way comments to be highlighted in the order detail screen. The extension is easy to install and use. The Order Comment Magento Extension is lightweight, fulfills the task with minimum obstruction and is in line with the Magento Order Management Workflow.

- **One Step Checkout**

URL: <http://www.ecomextension.com/onestep-checkout.html>

The “Checkout” is the most complicated part of placing an order online and usually have high checkout abandonment rate. We have come up with the Magento One Step Checkout Extension to simplify the checkout process by allowing the user to fill all the desired information in one page. The core feature of the Magento One Step Checkout Extension is that the six standard Magento checkout steps are reduced to one.

- **Order Follow-up Email**

URL: <http://www.ecomextension.com/order-followup.html>

Order Follow up Email Magneto Extension allows you to automatically send follow up emails to the customers after # number of hours. This Order Follow up Emails boosts the sales records by allowing the customers to buy your right product. The Follow up Email Magento Extension is an effective tool to stay in touch with your customers. It offers you irresistible benefits and powerful features.

- **Sales Servant**

URL: <http://www.ecomextension.com/sales-servant.html>

Sales Servant Extension for Magento is a perfect affiliate solution for your brand and provides for a great way to connect with the right publishers to increase engagement, traffic and online sales. Being integrated with [www.sale servant.com](http://www.sale servant.com) it ensures that your brand is connected to the publishers that match your brand positioning and strategic goals.

With our sales servant extension, you can connect to a platform where you can grow your online presence and get targeted visitors with affiliates that are tailored to your brand’s requirements and values!

- **Shipping per Item**

URL: <http://www.ecomextension.com/shipping-per-item-magento-extension.html>

Automatic shipping rate calculators greatly fall short and provide incorrect rates for certain products while handling heavy, lightweight or fragile products differently. With the Magento Shipping per item Extension, you can set the rates for shipping for each item differently.

Also, while shipping to different countries, specifically to Iceland or Canada, the shipping costs would drastically vary. Having flat table rates would make no sense. Our Shipping per item extension helps you indicate the shipping rate for each item in your store and make sure that the right amount is charged to the customer.

Appropriately charged customer sees this as an awesome service – and you get a happy loyal customer!

The individual rate can be set for each product either while creating new products or editing an existing one. This is done via the Magento admin panel.

For products that do not have the individual shipping rate indicated, the default rate will apply.

- **Customer Attributes**

URL: <http://www.ecomextension.com/customer-attribute-extension.html>

Collect data from customers effortlessly by adding attributes using the customer attributes extension. Unlimited attributes can be created by adding fields to the registration page, and all this information can be easily viewed on the grid view for a Magento Admin. As a store owner, you can use this information for segmentation of customers according to certain attributes in order to provide your customers with better services.

By installing this extension, store owners will experience the joy of better customer management.

This powerful tool can be used to gather customer attributes such as age, preferences and interests, receive documents etc.

- **Order Attributes**

URL: <http://www.ecomextension.com/order-attribute-extension.html>

Gone are those days when you had to send an email or give a call to the customers who have ordered a product just to collect the basic information lacking for the delivery. Instead of wasting your time to contact them, you can add up extra fields to take the information on the checkout page itself with the help of the Order Attributes Extension for Magento.

Order Attributes Extension lets you add up any type of field (text field, text area, date, yes/no, dropdown menu, check box) at any step (billing information, shipping information, payment method, shipping method) of the checkout process to make sure you have got all the information necessary for the correct delivery; after all customer satisfaction solely depends upon the perfect delivery!

- **Order By SKU**

URL: <http://www.ecomextension.com/order-by-sku.html>

Magento Order by SKU extension helps you search the products and add them to cart quickly. If you just start typing the SKU of your desired product in the search text box, it will give you suggestions of the product. All you need to do is select the desired product, write the quantity and click on the 'add to cart' button'.

Order by SKU extension is one of the most user friendly ways of adding the known products to cart. If you have got a printed brochure with you, you can just add the SKU and place the order in no time. You can add multiple products with the help of the CSV.

- **Contact Form**

URL: <http://www.ecomextension.com/contact-form-extension.html>

In order to make the enquiry easy and quick, Contact Form Extension for Magento has been developed that gives you the privilege of uploading an image in the contact form which can be sent as an attachment in the email.

In addition to the upload facility, Contact Form Extension gives you an option to select the department and add more departments along with their respective email addresses to send the mails to multiple departments.

- **Order Success**

URL: <http://www.ecomextension.com/order-success-extension.html>

Normally, once you place an order, you get a message like "Your order has been placed, thank you!" or something like that. However, it would be great if you get the order details on the same page, but Magento does not do the same. This led into the development of Order Success extension for Magento.

The Order Success extension lets you display all the details of the order on the check out page itself instead of displaying only the order confirmation messages and 'continue shopping' buttons. It lets you display the billing address, shipping address, item ordered as well as the bill amount on the checkout success page.

- **Easy Login**

URL: <http://www.ecomextension.com/easy-login-extension.html>

Whether it is a login process or payment process, people like it when it gets easier! People like change too! In the all the Magento eCommerce stores, people used to create their accounts by filling up all the necessary information. However, they used to enter email id for logging in. Brainvire EasyLogin extension now lets people log in through their mobile numbers, making it even more convenient and speedy.

With the help of Brainvire EasyLogin extension for Magento, the customers can not only register in the eCommerce websites using their mobile numbers, but can also login into their account using the same number. In addition to that, they can register at the checkout page and make the payment at the checkout using the same number. However, they can also change their number from 'My Account' page, as and when they want. The best thing is that, admin of the eCommerce store can check the mobile number of customer from the admin panel. So, you can keep track of all the customers' mobile numbers.

- **Price Slider**

URL: <http://www.ecomextension.com/magento-price-slider-extension.html>

Magento Price Slider Extension facilitates users to see products in a certain range of price as per their choice. This module adds jQuery ajax functionalities to the Magento Layered Navigation lists. The catalog lists appear without refreshing the page. Price Slider Extension for Magento replace the classic price filter by a price slider with an excellent AJAX and jQuery based UI at the front-end of your store. Moving the slider right or left applies the desired price filter on the product catalog. It is easy to configure this module with your Magento website.

- **Facebook Fan Box**

URL: <http://www.ecomextension.com/facebook-fanbox-magento-extension.html>

- **Advanced Product Options**

URL: <http://www.ecomextension.com/advanced-product-options.html>

In order to make the website more user friendly, you need to make the shopping process easier and quicker. The advanced product options extension for Magento does the same by creating custom options or it's combinations for products. You can assign the custom options to several products together as well as remove the custom options. You can apply them on the products edit page as well. You need not create the custom options for all the products separately. Instead, you can create a template and assign it to all the products to which you want it to apply.

The advanced product options extension also lets you add images and icon to the product description which makes it much easier for the users to understand and time saving too, rather than reading text and trying to understand it. Moreover, it also helps in tracking inventory and setting up the custom options. This easy to install and understand extension helps the best in the products management.

- **Grouped Options**

URL: <http://www.ecomextension.com/grouped-options-extension.html>

There are a lot of people who compare the features and prices of the products before buying. However, customers do not like to click and visit a lot of pages. So, in order to avoid the customer loss, make sure you provide them excellent shopping experience so that they tend to buy from your online store. Well, Grouped Options Extension for Magento can help you in this case.

Grouped Options Extension lets users select the options of the grouped products. For example: if users want to buy a Assembled Computer, they would like to buy monitor, keyboard, mouse with customizable options. So, grouped options extension lets them select the color, brand, size, etc of all these Simple Products with custom options and Configurable Products individually and then add them to cart; all from the same page. This will enhance their shopping experience which will be ultimately beneficial to you, as it increases your list of customers.

- **Category Access**

URL: <http://www.ecomextension.com/category-access.html>

It might be possible that you do not want to show the products of a particular category to a particular group of people or you might want to show that the products are out of stock or you do not want to showcase the price. All these things can be implemented easily with the help of Category Access extension for Magento.

For example: if you do not want the electronics category to be displayed to a group of people. Category Access extension lets you 'Deny' the permission to display 'electronics' category from products to that particular group of customers. If you do not want to display the product prices, 'Deny' the permission and it will display the product price 0. If you don't want the 'add to cart' button to get displayed, you can 'Deny' the permission; it will show the product 'out of stock'.
