## Where We have Done It?

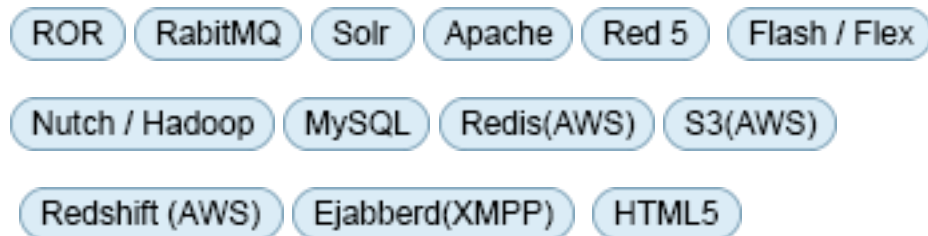

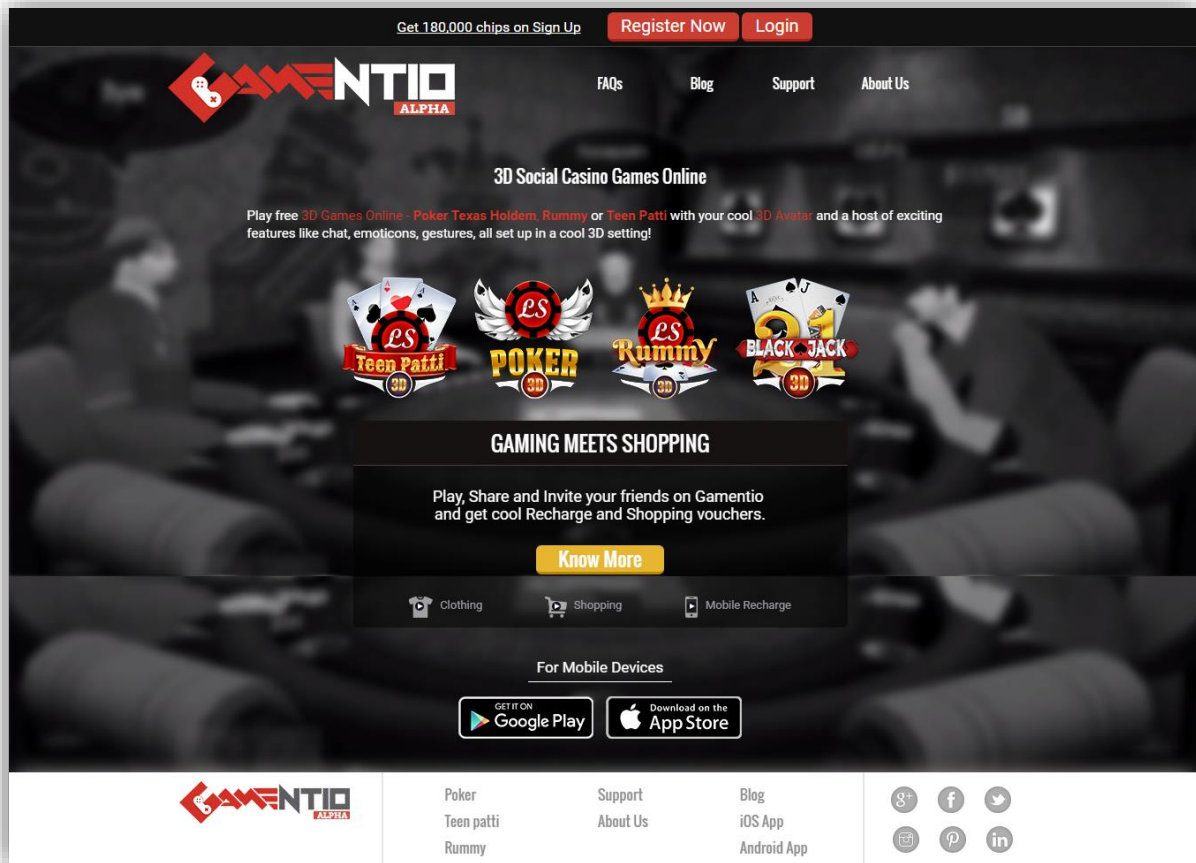

## Key Projects

Findnerd is an amazing social network that provides a platform for IT professionals to interact with each other through blogs, forums, tutorials, etc. As well it provides tools for Project Management and hour tracking.

Tech Stack:

Gamentio, aspires to disrupt the Social Casino (Non-Gambling) scene by introducing the concept of online 3D, so as to bring the online gaming experience closer to a real experience. This is achieved by enabling players to choose customizable 3D Avatars equipped with command-based gestures & expressions (joy, frustration, applause etc), in a 3D setting that looks & feels as if one is playing in a land-based casino.

Tech Stack:

- Liferay
- Apache
- Red 5
- Java
- Flash / Flex
- MySQL
- Redis(AWS)
- S3(AWS)
- Adobe Air
- Ejabberd(XMPP)

The screenshot shows the OYOKEY website landing page. At the top left is the OYOKEY logo. The main header features a cityscape background with the text "Internal Keyword Engine" in large white font, and the tagline "Structuring the world's data, one business at a time" below it. A navigation menu icon is visible in the top right corner. A vertical sidebar on the right edge contains the text "Feedback & Support". The main content area has the heading "OWN YOUR OWN KEYWORDS™" and a paragraph: "Our mission is to flatten the Internet information architecture, structure and organize the Web by giving Domain Owners the ability to create and manage Internal Keywords associated with their".

Oyokey is derived from 'Own Your Own Keywords'. The foundation or building block of Oyokey's technology is the principal of Internal Keywords.

Dental  Notebox

**Dental Notebox**

[SIGNUP](#) [SIGNIN](#)

**EASILY ORGANISE &  
SORT YOUR DENTAL PHOTOS**

**Organise Your Dental Photos & Digital Data**

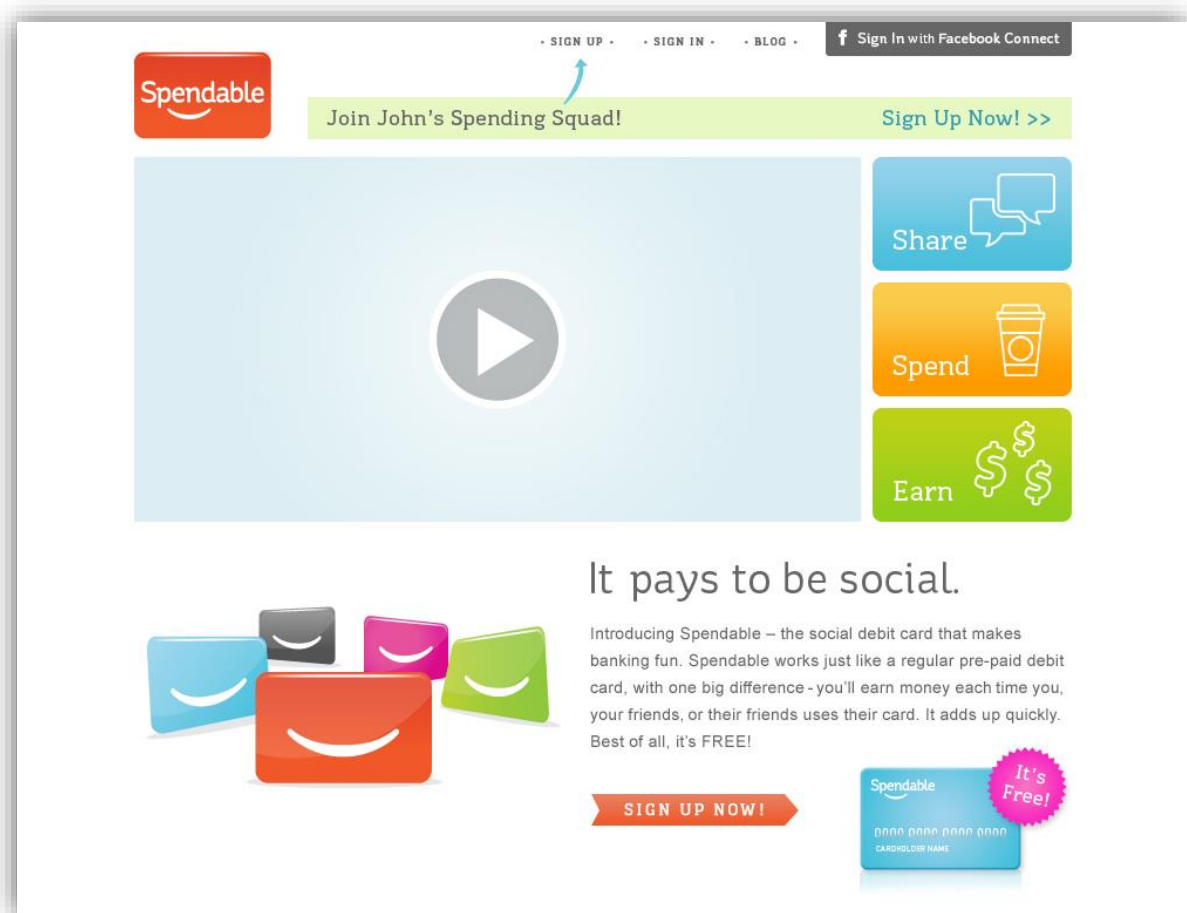

Dental Notebox lets you easily organise your dental photos and other digital data, so you can quickly and securely store your images and use them in powerful ways to increase case acceptances and new patient enquiries.

Through this you can take photos for every patient, and drop them into Dental NoteBox - The photos will be automatically organized by date in your patient's records. The photos can quickly be flipped, cropped or rotated by a team member, making it easy to find and use the photos at a later date. You can showcase your best work to help patients understand what is possible, and you can even share your best cases easily on popular social network sites. You can even make a video clip to make your content even more exciting - all with a few simple clicks.

Tech Stack:

Liferay

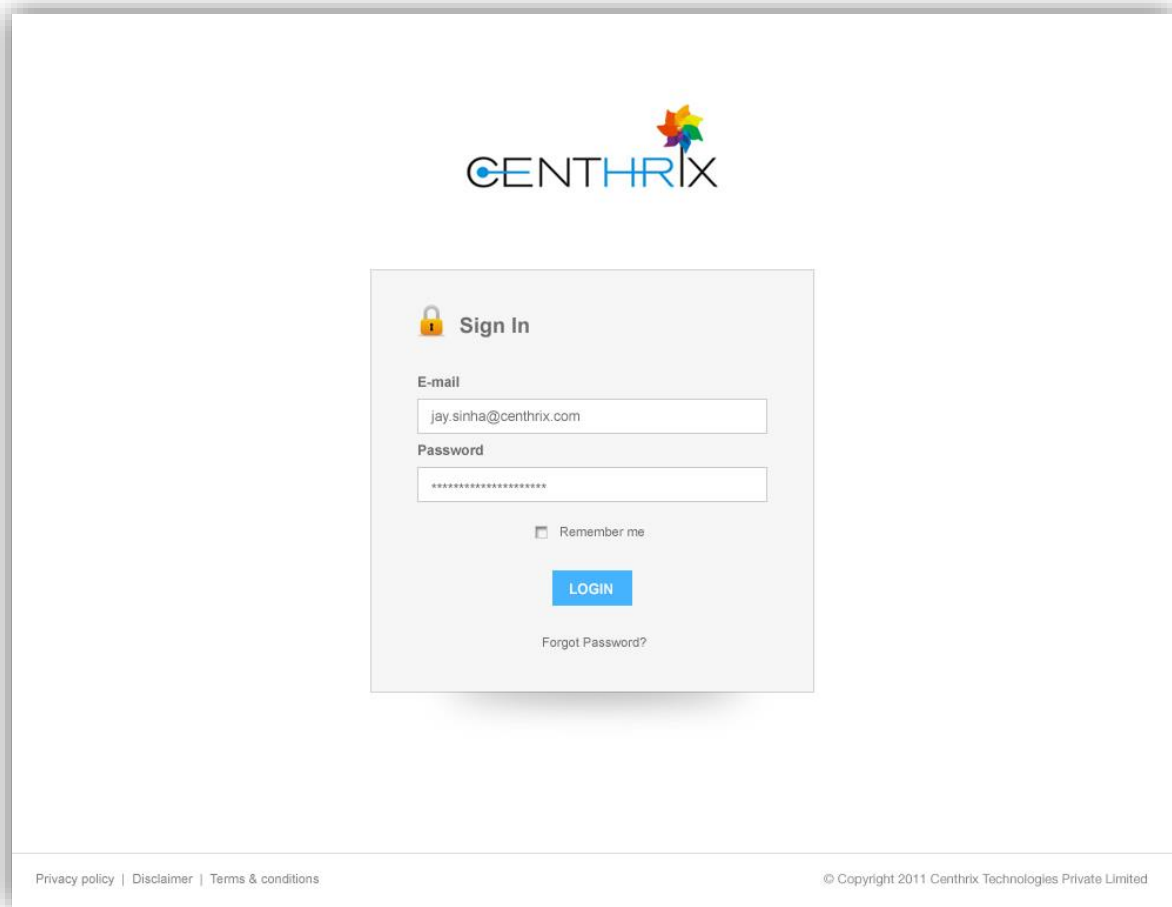

MySQL

Spendable.com is a social, financial, membership based web application where users get a plastic debit card from Spendable and can use it in real life. The application allows creating user's own network through inviting friends, thus resulting in a multi-level network.

Tech Stack:

Centhrix is a completely SaaS based HR management solution. It provides different modules such as Recruitment Management, Talent Management, Training Management, Financial Management, Attendance Management, Exit Management, Communication Management. Centhrix is offered to various buyers as per their requirements for all the modules or only a few modules.

MyCity4Kids help parents unearth the best their city has to offer kids in and around the neighborhood - from playschools and schools, hobby and sports classes to fun events, summer camps and workshops. It is an online marketplace where parents can search for information related to kids services, look for recommendations and make a booking by either paying online or in cash..

Tech Stack:

## Twingle

Twingle is a fun and easy app for iOS and Android to help you organize your social event. Twingle app can be used to create a personalized invitation for your event. Event dashboard makes it easy to invite friends and family, track RSVPs, share event pictures/videos and chat with your guests. Having a potluck dinner? Twingle make it easy for the host to create a sign-up sheet or for the guest to enter an item they plan to bring. Indecisive on what food to serve or what genre of music to play at your party? Create a poll and get instantaneous response from your guests.
